REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in back of this manual direct to: Commander, U.S. Army Tank-automotive and Armaments Command, AITN: AMSTA-IM-HHE, Warren, MI 48397-5000. A reply will be furnished to you.

TABLE OF CONTENTS

	Page	Illus Figure
Section I. INTRODUCTION	1-1	
Section II. REPAIR PARTS LIST	2-1	
Group 01 Engine		
0100 Engine Mounting	2-2	1
0100 Engine Assembly	2-4	2
0101 Cylinder Block (Sheet 1 of 3)	2-6	3
0101 Cylinder Block (Sheet 2 of 3)	2-7	3
0101 Cylinder Block (Sheet 3 of 3)	2-8	3
0101 Engine End Plates	2-12	4
0101 Air Box Covers and Drains	2-14	5
0101 Cylinder Head	2-16	6
0102 Crankshaft	2-18	7
0102 Crankshaft Cover, Trunnion and Oil Seal	2-20	8
0103 Flywheel Housing and Flexplate Assembly	2-22	9
0104 Piston and Connecting Rod Assembly	2-26	10

Approved for public release; distribution is unlimited.

Section IV.	NATIONAL STOCK NUMBER AND PART NUMBER INDEX	I-1

UNIT, DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. SCOPE

This manual lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of direct support and general support maintenance of the HET Tractor. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the Source, Maintenance, and Recoverability (SMR) codes.

2. GENERAL

This Repair Parts and Special Tools List (RPSTL) is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in NSN sequence.

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL for the performance of maintenance.

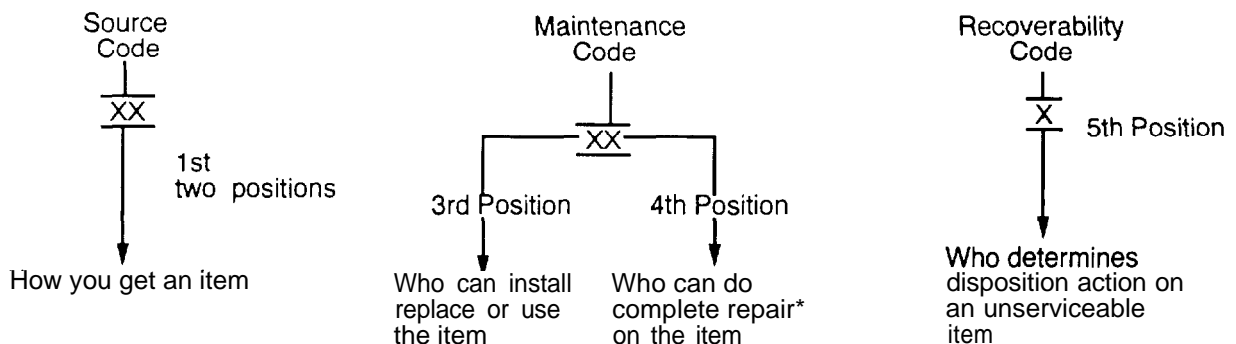

c. Section IV. National Stock Number and Part Number Index. A list, in National item identification number (NIIN) sequence, of all National stock numbers (NSNs) appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. NSNs and part numbers are cross-referenced to each illustration figure and item number appearance.

3. EXPLANATION OF COLUMNS

a. Illustration (Column (1)). This column is divided as follows:

- (1) ((a) FIG NO.) Figure Number. Indicates the figure number illustrating an exploded view of a functional group.
- (2) ((b) ITEM NO.). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a five-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout:

*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

3. EXPLANATION OF COLUMNS (CONT)

(1) Source Code. The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Source codes are always the first two positions of the SMR code. Explanations of source codes follow:

Code	Explanation
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply system.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
KD	An item of depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at unit or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.

MO - (Made at Unit Category)
MF - (Made at DS Category)
MH - (Made at GS Category)
MD - (Made at Depot)

items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by Part Number and Commercial and Government Entity (CAGE) in the Description column and listed in the Bulk Material group in the repair parts list in this manual. If the item is authorized to you by the third position code of the SMR code, but the source code indicates it is made at a higher category, order the item from the higher category of maintenance.

AO - (Assembled by Unit Category)
AF - (Assembled by DS Category)
AH - (Assembled by GS Category)
AD - (Assembled by Depot)

Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the category of maintenance indicated by the source code. If the third position code of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher category, order the item from the higher category of maintenance.

Code	Explanation
X A -	Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)
XB -	If an "XB" item is not available from salvage, order it using the Commercial and Government Entity (CAGE) and part number given.
XC -	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
XD -	Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGE and part number given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA."

(2) Maintenance Code. Maintenance codes tell you the category(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following categories of maintenance.

Code	Application/Explanation
C -	Crew or operator maintenance done within unit maintenance.
O -	Unit category can remove, replace, and use the item.
F -	Direct support category can remove, replace, and use the item.
H -	General support category can remove, replace, and use the item.
D -	Depot category can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following maintenance codes.

NOTE

Some limited repair may be done on the item at a lower category of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.

Code	Application/Explanation
O -	Unit is the lowest category that can do complete repair of the item.
F -	Direct support is the lowest category that can do complete repair of the item.
H -	General support is the lowest category that can do complete repair of the item.
D -	Depot is the lowest category that can do complete repair of the item.
Z -	Nonreparable. No repair is authorized.
B -	No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Recoverability Codes	Definition
Z -	Nonreparable item. When unserviceable, condemn and dispose of the item at the category of maintenance shown in the third position of SMR code.
O -	Reparable item. When uneconomically repairable, condemn and dispose of the item at unit category.
F -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support category.
H -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the general support category.
D -	Reparable item. When beyond lower category repair capability, return to depot. Condemnation and disposal not authorized below depot category.
A -	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number (Column (3)). Lists the NSN assigned to the item. Use the NSN for requests/requisitions.

d. CAGE (Column (4)). The CAGE is a five-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

e. Part Number (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered, but go ahead and use or furnish it as the replacement part.

f. Description (Column (6)). The column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) Not applicable.

(3) Items that are included in kits and sets are listed below the name of the kit or set.

(4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.

(5) Part numbers for bulk materials are referenced in the description column in the line item entry for the item to be manufactured/fabricated.

(6) Not applicable.

(7) The USABLE ON CODE, when applicable (see paragraph 4, Special Information).

(8) Not applicable

(9) The item name listed in the Description and Usable On Code column, when applicable, is indented by using dots (.) to show the relationship to the next higher assembly. Indentions shall not exceed five positions.

g. U/M (Column (7)). The Unit of Measure (U/M) indicates the measure (e.g., foot, gallon, pound) or count (e.g., each, dozen, gross) of a listed item. A two-character alpha code (e.g., FT, GL, LB, EA, DZ, GR) appears in this column to indicate the measure or count. If the U/M code appearing in this column differs from the Unit of Issue (U/I) code listed in the Army Master Data File (AMDF), request the lowest U/I that will satisfy your needs.

h. QTY INC IN UNIT (Column (8)). The Quantity Incorporated in Unit (CITY INC IN UNIT) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (e.g., shims, spacers).

4. SPECIAL INFORMATION

a. USABLE ON CODE title appears in the lower right corner of column (6), Description. Usable on codes are shown in the right-hand margin of the description column. Uncoded items are applicable to all models. Identification of the usable on codes used in this publication are:

Code	Used on
MTH	Model M 1070

b. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual. Items that are to be made from bulk material are identified in the description column by part number and CAGE in this manual. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 9-2320-360-20, Unit Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter, and TM 9-2320-360-34, Direct Support and General Support Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET).

c. Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM 9-2320-360-20, Unit Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter, and TM 9-2320-360-34, Direct Support and General Support Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET). Items that make up the assembly are listed immediately following the assembled item entry.

d. Line item entries for repair parts kits and sets appear at the end of the book in FGC 9401.

e. Items which have the word BULK in the figure number column will have an index number shown in the item number column. This index number is furnished for use as a cross-reference between the National Stock Number/Part Number Index and the bulk material list in Section II.

f. The following publications pertain to the HET Tractor and its components:

TM 9-2320-360-10, Operator's Manual for Truck, Tractor, M1070,8x8, Heavy Equipment Transporter (HET)

TM 9-2320-360-10-HR, Hand Receipt Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET)

LO 9-2320-360-12, Lubrication Order for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET)

TM 9-2320-360-20 (Volumes 1, 2, and 3), Unit Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET)

TM 9-2320-360-34 (Volumes 1 and 2), Direct Support and General Support Maintenance Manual for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET)

TB 9-2320-360-14, Warranty Technical Bulletin for Truck, Tractor, M1070, 8x8, Heavy Equipment Transporter (HET)

g. Throughout the Electrical System section, Functional Group Code (FGC) 0600, there are several cases where electrical harness illustrations are continued on succeeding page(s). Leader lines are shown to indicate where the illustrations connect. See page 2-240, Figure 88, Sheets 1 of 4 and 2 of 4 for an example of this situation.

5. HOW TO LOCATE REPAIR PARTS

a. When National Stock Number or Part Number Is Not Known:

(1) First. Using the table of contents, determine the functional group or subfunctional group to which the item belongs. This is necessary since figures are prepared for functional groups and subfunctional groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the functional group or subfunctional group to which the item belongs,

(3) Third. Identify the item on the figure and note the item number of the item.

(4) Fourth. Refer to the Repair Parts List for the figure to find the line item entry for the item number noted on the figure.

b. When National Stock Number or Part Number Is Known:

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. The NSN index is in National Item Identification Number (NIIN)* sequence. The part numbers in the Part Number index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

The NIIN consists of the last nine digits of the NSN (i.e., 5305-01-674-1467).

NSN
NIIN

(2) Second. After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

6. ABBREVIATIONS

The abbreviations used in this manual are found in MIL-STD-12.

WARRANTY

THIS VEHICLE IS WARRANTED FOR 12 MONTHS

WARRANTY TECHNICAL BULLETIN NO **TB-9-2320-360-14**

GOVERNMENT ACCEPTANCE

THIS VEHICLE CONFORMS TO ALL U.S. FEDERAL MOTOR VEHICLE SAFETY STANDARDS AS APPLICABLE. FUTURE REPLACEMENT OF TIRE/WHEELS OF GREATER CAPACITY WILL NOT INCREASE GVHW SHOWN. OVERSPEEDING OR OVERLOADING WILL VOID WARRANTY.

MANUFACTURED BY OSHKOSH TRUCK CORPORATION

This fine document...

Was brought to you by me:

[Liberated Manuals -- free army and government manuals](#)

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:

<A HREF=<http://www.liberatedmanuals.com/>>Free Military and Government Manuals

- Sincerely
Igor Chudov
